

# Sample Push Partner Site Flow Diagram

## Initial Greeting

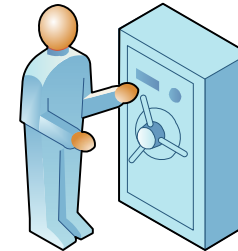

Employees are provided forms and screeners will answer any general questions that may arise.

## Screening and Education

Employees that have not previously completed a screening form will do so at this time. Dispensing staff review the screening forms and perform any necessary updates to the information.

## Medication Dispensing

Dispensing staff review completed documentation and determine the appropriate medication based on the correct Antibiotic Algorithm. Employees are given the correct Drug Information Sheet and Biological Agent Fact Sheet and instructed to carefully review them. Dispensing staff receive the medication from a secure storage area and dispense the medications to the employees

### Key Features:

- Separate entrance and exit for ease of movement.
- Use more than one line to speed up the process.
- Medications must be secured at all times.
- Need not follow this exact floor plan as long as ample space is provided for each key function.
